About Canaf

Canaf is a public company listed on the TSX-V Exchange. Canaf's registered office is in Vancouver, Canada, with subsidiary offices in the United Kingdom and South Africa. Canaf owns 100% of Quantum Screening and Crushing (Pty) Ltd., ("Quantum"), a South African based company that owns 70% of Southern Coal (Pty) Ltd., ("Southern Coal"), a company that produces a high carbon, de-volatized (calcined) anthracite.

About Southern Coal

Southern Coal produces calcined anthracite, a product used primarily as a substitute to coke in sintering processes. Southern Coal produces calcined anthracite by feeding washed anthracite coal through rotary kilns, at temperatures between 900 and 1100 degrees centigrade; the volatiles are driven off and the effective carbon content increased.

Southern Coal's two largest clients are African leaders in steel and ferromanganese production. Southern Coal operates near Newcastle, KwaZulu-Natal, where Quantum's three kilns operate; the majority of Southern Coal's feedstock anthracite is supplied from local anthracite mines in KwaZulu-Natal.
