CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6-month period ended April 30, 2021

Expressed in U.S Dollars

INTRODUCTION

Date Prepared: 21st June 2021.

This Management Discussion and Analysis, (“MDA”) covers the operations of Canaf Investments Inc. (“Canaf” or the “Corporation”) for the six months ended April 30, 2021 and should be read in conjunction with the unaudited consolidated Financial Statements for the six months ended April 30, 2021 and audited consolidated Financial Statements for the year ended October 31 2020 and related notes. The Financial Statements are presented in accordance with International Financial Reporting Standards (“IFRS”). Canaf’s accounting policies are described in Note 2 of the unaudited Financial Statements for the six months ended April 30, 2021. The financial statements together with this MDA are intended to provide investors with a reasonable basis for assessing the financial performance of the Corporation.

All dollar amounts are expressed in US dollars, the functional currency of the Corporation, unless otherwise stated. The Corporation’s listing on the TSX-V however, is quoted in Canadian Dollars. Additional information relating to the Corporation is available on SEDAR at www.sedar.com. or at Corporation’s website at www.canafinvestments.com.

DESCRIPTION OF BUSINESS

Canaf is incorporated in the Province of Alberta with two wholly owned subsidiaries in South Africa, Quantum Screening and Crushing (Pty) Limited (“Quantum”), and Canaf Investments (Pty) Ltd, (“Canaf Ltd”).

Quantum, through its 70% owned subsidiary, Southern Coal (Pty) Ltd. (“Southern Coal”), processes anthracite coal into de-volatilised anthracite (calcined anthracite) for sale mostly to steel and ferromanganese manufacturers as a substitute product for coke.

Canaf Investments (Pty) Ltd, incorporated in 2019, acts as Canaf’s South African holding company with the intention of creating a diverse Corporation focused on sustainable and long-term growth sectors within South Africa. Canaf Investments (Pty) Ltd owns 100% of Canaf Estate Holdings (Pty) Ltd., (“CEH”).

Southern Coal – Calcined Anthracite, South Africa

Southern Coal produces calcined anthracite, which is primarily sold as a substitute to coke in sintering processes, by feeding anthracite coal through its rotary kilns, at temperatures between 900 and 1100 degrees centigrade; the volatiles are driven off and the effective carbon content increased.

Southern Coal’s clients are world leaders in steel and ferromanganese production. Southern Coal’s three kilns operate near Newcastle, KwaZulu Natal.

Canaf Estate Holdings – Property Investments, South Africa

CEH is a property investment company focused on acquiring, redeveloping and renting properties primarily within the suburbs of the old Johannesburg CBD. CEH made its first property acquisition in August 2019.

OVERALL PERFORMANCE AND OUTLOOK

The Corporation reports a strong six months with Sales of US\$6,292,558, a 15% improvement compared to the previous six months ended April 30, 2020 (US\$5,490,982), and net income of US\$440,206 (2020: US\$285,684) or CAN\$560,326 (2020: CAN\$384,519). Gross margins continue to hold strong and currently sit at 11.8% for the six months.

Revenue is expected to further increase for Q3 as demand for Southern Coal's products remain strong.

As announced on 21 June 2021, management are pleased to confirm that Quantum has secured further land tenure, within close proximity to its existing premises in South Africa. The signing of the lease forms part of management's ambitions to improve security to its South African anthracite beneficiation business, as well as providing opportunities for future growth and diversification. The agreement allows for a due diligence until 31 July 2021, and the term of the lease is for five years, with an option to extend for a further four years and nine months.

The new premises will enable Quantum and its operating business Southern Coal (Pty) Ltd, to handle greater quantities of material as well as relocate some of its product sizing operations to the site. Furthermore, the site brings added capacity for growth and diversification which the management team is actively pursuing.

Canaf is also pleased to announce the launch of its new website, www.canafinvestments.com. Management are keen that the new site becomes a platform to continue to increase awareness of the Canaf operations and will be further developing the site and content over the coming months.

Covid-19

Whilst Covid-19 remains a constant concern, the board has taken steps to minimise the impact of the pandemic on the business of the company. The board believes that the company is well positioned in the market and is pleased to confirm that the pandemic thus far has not had a negative effect on the financial performance of the Company.

As of 30 April 2021, Canaf shareholder equity stood at US\$5.084 million (CAN\$6.354 million).

BROAD-BASED BLACK ECONOMIC EMPOWERMENT TRANSACTION (B-BBEE)

As part of Southern Coal's B-BBEE transformation program, Amandla Amakhulu (Pty) Ltd, ("AAM"), a 100% black, privately owned, and ringfenced, company incorporated in South Africa, acquired 30% of the issued shares of Southern Coal, from Canaf's wholly owned subsidiary, Quantum, for the value of 18 million Rand. The financial effective date for the transaction is 01 August 2018.

Quantum in return received cumulative, redeemable preference shares in AAM in the amount of the purchase price. These preference shares shall provide preferential dividends, until redeemed by AAM. These dividends will be secured by an irrevocable direction from AAM to Southern Coal to pay Quantum such dividends from any distribution to AAM. Dividends paid to date are US\$323,050 (as at 30 Apr 2021).

CLAIM AGAINST KILEMBE MINES LIMITED

In August 2006, Canaf, then known as Uganda Gold Mining, announced the termination of any further investment into its Kilembe Copper-Cobalt Project in Uganda. Since 2007, the Company has been involved in a legal dispute with Kilembe Mines Limited, ("KML"), wherein the Corporation seeks general damages, special damages and costs of the Arbitration from KML for breach of contract. In January 2013, the high court of Uganda referred the case back to arbitration for determination.

On May 29, 2013, a preliminary meeting was held between the Company, KML and the then arbitrator. After the filing of the Statements of Claim and Defence had been concluded, the Corporation's appointed Ugandan Advocates (MMAKS Advocates) notified the board that the Arbitrator had decided to step down for personal reasons.

MMAKS Advocates and the Government's Solicitor General then agreed to a new Arbitrator, Retired Justice James Ogoola. The parties held a preliminary meeting with the Arbitrator who requested them to provide their fee estimate for the conduct of the Arbitration. The fee was later agreed between the parties and the Arbitrator with MMAKS Advocates disbursing the Corporation's portion of the fee on account. MMAKS Advocates applied for and was granted leave by the Arbitrator to file an Amended Statement of Claim on the Corporation's behalf. The parties now await for the matter to be set down for scheduling and hearing by the Arbitrator.

RESULTS OF OPERATIONS

SIX MONTHS ENDED APRIL 30, 2021

The Corporation reported net income for the six months ended April 30, 2021 of US\$440,206 (2020: US\$285,684), an increase of US\$154,522 (54%) on revenues to date of US\$6,292,558 (2020: US\$5,490,982).

The growth in revenues compared to last year is primarily due to a new customer ramping up its own production, which subsequently increased demand of Southern Coal's material.

Sales

Revenue for the quarter is US\$3,109,892 (2020: US\$2,824,252), a 10% increase due to the ramping up of production and subsequent demand of product from a major customer, taking the six months sales to US\$6,292,558, a 15% increase compared to the prior year (2020: US\$5,490,982).

CEH generated rental incomes to date of US\$16,162.49. The Corporation continues to assess new opportunities to acquire further property in Johannesburg.

Foreign Currency Translation Reserve

The Corporation is not subject to currency fluctuations within its core business in South Africa however the Corporation is subject to transactions in various currencies and the volatility in international currency markets does have an impact on some costs and the translation into USD, the reporting currency of the Corporation.

CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6 month period ended April 30, 2021

Expressed in U.S Dollars

The 6 months comprehensive gain on foreign exchange amounts to US\$520,433 compared to the same time period last year of a loss of US\$732,288 and is primarily as a result of the translation into US\$ the reporting currency. As of April 30, 2021, the Corporation has accumulated foreign currency other comprehensive loss of US\$1,646,661, (October 31, 2020: US\$2,149,469).

The Corporation does not hedge net asset translation movements.

Deficit

During the six months ending April 30, 2021 the deficit has reduced by US\$357,373, from US\$3,049,200 at the 31st October 2020, to US\$2,691,827.

SUMMARY OF QUARTERLY RESULTS

The following financial data is derived from the Corporation's financial statements for the past 8 quarters.

The current quarter is in line with management expectations and is an improvement on the previous year's quarter; EPS for the past quarter is US\$0.005/share. Total EPS for the past 4 quarters is US\$0.022/share.

Management expects this fiscal year to continue to have a level of uncertainty related to the markets that it supplies as well as the continuing prevalence of the Covid-19 virus.

Basic and Diluted Earnings (Loss) Per Share (USD)	0.019	0.011	0.013	0.014	(0.004)	0.010
Basic and Diluted Earnings (Loss) Per Share (CANS)	0.025	0.015	0.017	0.018	(0.005)	0.012

The main components making up the total assets balance as at October, 2020 of US\$5,580,049 (2019: US\$5,254,018) are: US\$1,055,996 (2019: US\$1,146,260) of non-controlling interest borrowings; US\$740,404 (2019: US\$643,860) property, plant and equipment; US\$2,047,774 (2019: US\$390,916) in cash; US\$1,296,617 (2019: US\$2,358,108) in accounts receivable, with the reduction in balance between years reflecting the reduction in payment terms associated with a key customer; and US\$417,400 (2019: US\$649,498) in inventories, comprising mostly of stock on hand.

LIQUIDITY AND CAPITAL RESOURCES

At April 30, 2021, the Corporation had cash of US\$2,760,929 (October 31, 2020: US\$2,047,774) and working capital of US\$3,351,221 (Oct 31, 2020 - US\$2,556,615). Surplus cash and cash equivalents are deposited in interest accruing accounts.

Working capital components include cash in current or interest-bearing accounts, trade and other receivables, sales tax receivable, inventories and prepaid expenses and deposits, trade and other payables, sales tax payable, and income tax payable.

Trade receivables and trade payables are expected to increase or decrease as sales volumes change.

	6 Months Ended Apr 30, 2021	Year Ended Oct 31, 2020
	US\$	US\$
Cash provided by (used) in operating activities	391,982	2,366,657
Cash used in investing activities	(2,676)	(334,391)
Cash provided by (used) in financing activities	-	-
Increase (Decrease) in cash	389,306	2,032,266

Operations provided US\$391,982 in cash during the six months ended April 30, 2021 (October 31, 2020 provided US\$2,366,657) largely due to timing of supplier payments and tightening of payment terms with customers.

The Covid-19 pandemic has created challenging business conditions all over the globe. Canaf's management have assessed the cash position, as well as running operational contingency plans and feel the group is in a very strong position for 2021.

Except as described above, the Corporation's management is not aware of any other trends or other expected fluctuations in its liquidity that would create any deficiencies. The Corporation's management believes that its cash balances will be sufficient to meet the Corporation's short-term and long-term requirements for ongoing operations and planned growth. The Corporation does occasionally utilize cash reserves to offer suppliers earlier payment terms in return for more favorable rates.

CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6 month period ended April 30, 2021

Expressed in U.S Dollars

ECONOMIC DEPENDENCE

Sales from the Corporation's South African coal processing business are substantially derived from a very few number of customers and as a result, the Corporation is economically dependent on these customers. The Corporation's exposure to credit risk is limited to the carrying value of its accounts receivable. As at April 30, 2021, Southern Coal had trade receivables of US\$1,488,509.83 (October 31, 2020: US\$1,296,617) due from these customers and were collected subsequent to the quarter-end.

REVENUE RECOGNITION

Revenue from the sale of calcined anthracite is recognized upon transfer of title, which is completed when the physical product is delivered to customers and collection is reasonably assured. Interest and other income are recognized when earned and collection is reasonably assured.

COMMITMENT

The Corporation has an agreement to lease premises for its coal processing plant in South Africa for a term of ten years, which expired on December 31, 2020, with a monthly rent of Rand 35,000 (US\$2,310). The Corporation remains in negotiations and is assessing its options to extend its terms for the lease or security of tenure for its premises. Until new terms are formalised, the Corporation will continue to operate under the same terms of the existing lease with an effective notice period of 2 months for both lessee and lessor.

In June 2021 the Corporation secured a further land tenure for Quantum. The agreement allows for a due diligence period seven weeks until 31 July 2021 and the term of the lease is for five years, with an option to extend for a further four years and nine months.

TRANSACTIONS WITH RELATED PARTIES

At the report date, key management consists of Christopher Way (CEO, President and a Director of the Corporation), Rebecca Williams (CFO and Director), Peter Wassenaar (Chairman and Director), who has taken over the role of Chairman from the late David Way as at 1st December 2020

Fees incurred for services by key management personnel during the six months ended April 30, 2021 and 2020:

Services	Party	6 Months Ended	
		Apr 30 2021	Apr 30 2020
		US\$	US\$
CFO and Director	Professional fees for financial administration and management services	12,773	11,719
Chairman and Director President, CEO and Director	Consulting fees for financial administration and management services	4,077	2,909
Company Secretary	President, CEO and director of the Corporation	40,173	37,308
Directors	Professional fees for administration and management services	2,673	-
Director	Directors fees for administration and management services in relation to the Company's coal processing business in South Africa	35,509	45,619
	Consulting fees	9,112	12,476
		95,204	97,555

OFF-BALANCE SHEET ARRANGEMENTS

The Corporation has no off-balance sheet arrangements

CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6 month period ended April 30, 2021

Expressed in U.S Dollars

ACCOUNTING STANDARDS ISSUED

A number of new accounting standards, amendments to standards, and interpretations have been issued for this reporting period:

IFRS 16 – Leases

IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases. The standard includes two recognition exemptions for lessees: leases of 'low-value' assets; and short-term leases. For those assets determined to meet the definition of a lease, at the commencement date, a lessee will recognize a liability to make lease payments and an asset representing the right to use the underlying asset during the lease term. Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset. IFRS 16 also requires lessees to make more extensive disclosures than under IAS 17.

In transitioning to IFRS 16, which is effective for annual periods beginning on or after January 1, 2019, a lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs. The Company will apply IFRS 16 on November 1, 2019 using the modified retrospective approach, which means the cumulative impact of adoption will be recognized as at November 1, 2019 and the comparatives will not be restated. The Company will elect to use the exemptions proposed by the standard on lease contracts for which the lease terms end within 12 months as of the date of initial application, and lease contracts for which the underlying asset is of low value.

The Company has completed its impact assessment of IFRS 16 and based on the Company's evaluation, IFRS 16 is not expected to have a material effect on the consolidated financial statements as the Company has elected to use the exemption proposed for lease terms that end within 12 months of the date of initial application. Any new leases will be assessed and accounted for in line with IFRS16 guidelines.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The details of Canaf's accounting policies are presented in Note 2 of the un-audited Financial Statements for the six months ended April 30, 2021. These policies are considered by management to be essential to understanding the processes and reasoning that go into the preparation of the Corporation's financial statements and the uncertainties that could have a bearing on its financial results.

CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6 month period ended April 30, 2021

Expressed in U.S Dollars

MANAGEMENT OF FINANCIAL RISKS

The Corporation is exposed to various risks in relation to financial instruments. The Corporation's financial assets and liabilities by category are summarized in Note 2(o) of the consolidated financial statements. The Corporation's risk management is coordinated by the board of directors and focuses on actively securing the Corporation's short to medium-term cash flows and raising finances for the Corporation's capital expenditure program. The Corporation does not actively engage in the trading of financial assets for speculative purposes. The most significant financial risks to which the Corporation is exposed are described below.

Foreign Currency Risk

Foreign exchange risk arises because of fluctuations in exchange rates. The Corporation conducts a significant portion of its business activities in foreign currencies. The Corporation's subsidiaries, principally located in South Africa, routinely transact in the local currency, exposing the Corporation to potential foreign exchange risk in its financial position and cash flows.

The assets, liabilities, revenue and expenses that are denominated in foreign currencies will be affected by changes in the exchange rate between the United States dollar and these foreign currencies. The Corporation does not currently use financial instruments to mitigate this risk.

Credit Risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Corporation limits its exposure to credit loss for cash by placing its cash with high quality financial institutions and for trade receivable by performing standard credit checks. The credit risk for cash and trade receivables is considered negligible since the counterparties are reputable banks with high quality external credit ratings and customers with no history of default.

The Corporation has a credit risk exposure related to its economic dependence on a very few customers for its calcine sales. The Corporation has assessed its exposure to credit risk and has determined that no significant risk exists from these concentrations of credit.

Liquidity Risk

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations when they become due. The Corporation ensures, as far as reasonably possible, that it will have sufficient capital in order to meet short-term business requirements, after taking into account cash flows from operations and the Corporation's holdings of cash. The Corporation has a working capital of US\$3,351,221 as at April 30, 2021. There can be no assurance that the Corporation will be successful with generating and maintaining profitable operations or will be able to secure future debt or equity financing for its working capital and expansion activities.

Commodity Price Risk

The Corporation's revenues, earnings and cash flows are directly related to the volume and price of calcine sold and are sensitive to changes in market prices over which it has little or no control. The Corporation has the ability to address its price-related exposures through the use of sales contracts.

Fair Value

The Corporation uses the following hierarchy for determining fair value measurements:

- Level 1: Quoted prices in active markets for identical assets or liabilities.
- Level 2: Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.
- Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that is not based on observable market data.

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

The Corporation's financial assets measured at fair value through profit or loss use Level 1 valuation techniques during the six months ended April 30, 2021. The carrying values of the Corporation's financial assets and liabilities approximate their fair values as at April 30, 2021.

CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6 month period ended April 30, 2021

Expressed in U.S Dollars

CAPITAL RISK MANAGEMENT

The Corporation's objectives in managing its capital are to ensure adequate resources are available to fund its coal processing business in South Africa, to seek out and acquire new projects of merit, and to safeguard its ability to continue as a going concern. The Corporation manages its share capital as capital, which as of April 30, 2021 totaled US\$8,079,463 (October 31, 2020: US\$8,079,463).

The Corporation manages its capital structure in a manner that provides sufficient funding for operational and capital expenditure activities. Funds are secured through the sale of calcine in South Africa and, when necessary, through debt funding or equity capital raised by means of private placements. There can be no assurances that the Corporation will be able to obtain debt or equity capital in the case of operating cash deficits.

The Corporation may, from time to time, invest capital that is surplus to immediate operational needs in short-term, liquid, and highly rated financial instruments held with major financial institutions, or in marketable securities. The Corporation may also, from time to time, enter into forward foreign exchange and commodity price contracts to hedge a portion of its exposure to movements in foreign exchange and commodity prices.

The Corporation has no externally imposed capital requirements and has not paid or declared any dividends since the date of incorporation, nor are any contemplated in the foreseeable future. There were no changes in the Corporation's approach to capital management during the quarter ended April 30, 2021.

RISKS AND UNCERTAINTIES

The Corporation is subject to a number of risk factors due to the nature of the mining business in which it is engaged, including movements in commodity prices, which are difficult to forecast. The Corporation seeks to counter these risks as far as possible by selecting exploration areas on the basis of their recognized geological potential to host economic deposits.

The Corporation's assets are of indeterminate value. For further particulars see the financial statements filed on www.sedar.com.

Covid-19 Pandemic

The emerging pandemic scene globally could have negative consequences for all operations. Sickness as a result of the virus could impact sales, ability to service sales, rent collection, and general management. The board has put contingency plans in place to support with continuing the Southern Coal (South African) operations and manage any care and maintenance measures that need to be implemented.

The operations of the board, senior management and administration, given its already remote working structure, should not be adversely affected by necessary measures to minimise the risks and effects of the virus; we do not see any reason why the corporate side of the business cannot function as usual. International travel of senior management will however be suspended until it is recommended safe by the respective Governments of the United Kingdom and South Africa.

Exploration and Development

The Corporation is not currently engaged in any exploration or development projects.

Operating Hazards and Risks

Operations in which the Corporation has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of resources, any of which could result in work stoppages, damage to persons or property and possible environmental damage. Although the Corporation has or will obtain liability insurance in an amount which it considers adequate, the nature of these risks is such that liabilities might exceed policy limits, the liabilities and hazards might not be insurable, or the Corporation might not elect to insure itself against such liabilities due to high premium costs or other reasons, in which event the Corporation could incur significant costs that could have a material adverse effect upon its financial condition.

Metal and Mineral Prices

Factors beyond the control of the Corporation affect the price and marketability of gold and other metals and minerals. Metal and mineral prices have fluctuated widely, particularly in recent years and are affected by numerous factors including international, economic and political trends, expectations of inflation, currency exchange fluctuations, interest rates, global or regional consumption patterns, speculative activities and worldwide production levels. The effect of these factors on the Corporation's future prospects cannot accurately be predicted.

CANAF INVESTMENTS INC.

Management Discussion and Analysis for the 6 month period ended April 30, 2021

Expressed in U.S Dollars

Political Risk

Quantum and Canaf Investments is located in South Africa and consequently the Corporation will be subject to certain risks, including currency fluctuations, electricity outages and possible political or economic instability, and exploration and production activities may be affected in varying degrees by political stability and government regulations relating to the industry. Any changes in regulations or shifts in political attitudes are beyond the control of the Corporation and may adversely affect its business. Exploration may be affected in varying degrees by government regulations with respect to restrictions on future exploitation and production, price controls, export controls, foreign exchange controls, income taxes, expropriation of property, environmental legislation and site safety.

Environmental Factors

All phases of the Corporation's operations will be subject to environmental regulation in South Africa.

Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. The exploration, development and production activities of the Corporation will require certain permits and licenses from various governmental authorities and such operations are and will be governed by laws and regulations governing exploration, development and production, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, safety and other matters. Companies engaged in exploration activities generally experience increased costs and delays as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all licenses and permits which the Corporation may require to carry out exploration and development of its projects will be obtainable on reasonable terms or on a timely basis, or that such laws and regulations would not have an adverse effect on any project that the Corporation may undertake.

Cash Flows and Additional Funding Requirements

The Corporation has significant revenues from operations and produces positive cashflow. The Corporation intends to expand organically using available cash and local debt financing, when required.

Should the Corporation decide to develop or acquire a relatively large asset or opportunity, the majority of sources of funds will in large portion be derived from the issuance of equity or project finance debt. Although the Corporation presently has sufficient financial resources and has been successful in the past in obtaining equity and debt financing to undertake its currently planned exploration and development programs, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Corporation.

Enforcement of Civil Liabilities

Substantially all of the assets of the Corporation will be located outside of Canada, with the directors and officers of the Corporation being resident outside of Canada also. As a result, it may be difficult or impossible to enforce judgments granted by a court in Canada against the assets of the Corporation or the directors and officers of the Corporation residing outside of Canada.

Management

The Corporation is dependent on a relatively small number of key employees, the loss of any of whom could have an adverse effect on the Corporation.

CAUTIONARY STATEMENTS ON FORWARD-LOOKING INFORMATION

This MD&A together with the Corporation's consolidated financial statements for the six months ended April 30, 2021 contain certain statements that may be deemed "forward-looking statements". All statements in this MD&A, other than statements of historical fact, that address exploration drilling, exploitation activities and events or developments that the Corporation expects to occur, are forward looking statements. Forward looking statements in this document are statements that are not historical facts and are generally, but not always, identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential" and similar expressions, or that events or conditions "will", "would", "may", "could" or "should" occur. Information inferred from the interpretation of drilling results and information concerning resource estimates may also be deemed to be forward looking statements, as it constitutes a prediction of what might be found to be present when and if a project is actually developed. Although the Corporation believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in the forward-looking statements.

Inherent in forward-looking statements are risks and uncertainties beyond the Corporation's ability to predict or control, including risks that may affect the Corporation's operating or capital plans, including risks generally encountered in the exploration and development of natural resource properties, such as unusual or unexpected geological formations, unanticipated metallurgical difficulties, ground control problems, process upsets and equipment malfunctions; risks associated with labour and unavailability of skilled labour; fluctuations in the market prices of the Corporation's principal products, which are cyclical and subject to substantial price fluctuations; risks created through competition for natural resource properties; risks associated with lack of access to markets; risks associated with mineral and resource estimates, including the risk of errors in assumptions or methodologies; risks posed by fluctuations in exchange rates and interest rates, as well as general economic conditions; risks associated with environmental compliance and permitting, including those created by changes in environmental legislation and regulation; risks associated with the Corporation's dependence on third parties in the provision of transportation and other critical services; risks associated with aboriginal title claims and other title risks; social and political risks associated with operations in foreign countries; and risks associated with legal proceedings.

Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this MD&A. Such statements are based on a number of assumptions which may prove to be incorrect, including, but not limited to, the following assumptions: that there is no material deterioration in general business and economic conditions; that there is no unanticipated fluctuation of interest rates and foreign exchange rates; that the supply and demand for, deliveries of, and the level and volatility of commodity prices develop as expected; that the Corporation receives regulatory and governmental approvals as are necessary on a timely basis; that the Corporation is able to obtain financing as necessary on reasonable terms; that there is no unforeseen deterioration in the Corporation's activity costs; that the Corporation is able to continue to secure adequate transportation as necessary for its exploration activities; that the Corporation is able to procure equipment and supplies, as necessary, in sufficient quantities and on a timely basis; that exploration activity timetables and capital costs for the Corporation's planned projects are not incorrectly estimated or affected by unforeseen circumstances; that costs of closure of various operations are accurately estimated; that there are no unanticipated changes to market competition; that the Corporation's estimates in relation to its natural resource interests are within reasonable bounds of accuracy (including with respect to size, grade and recoverability of mineral projects) and that the geological, operational and price assumptions on which these are based are reasonable; that no environmental and other proceedings or disputes arise; and that the Corporation maintains its ongoing relations with its employees, consultants and advisors.

Readers are cautioned that the foregoing list of important factors and assumptions is not exhaustive. Forward-looking statements are not guarantees of future performance. Events or circumstances could cause the Corporation's actual results to differ materially from those estimated or projected and expressed in, or implied by, these forward-looking statements. The Corporation undertakes no obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of factors, whether as a result of new information or future events or otherwise, except as may be required under applicable laws.
